

ISEM 2004

August 22 - 24, 2004, Quebec City, PQ, Canada

Announcement and Call for Papers

Conference Theme: Ecological Models as Decision Tools in the 21st Century

- Population Models - PVA, Endangered Species, Demographic
- Integrated Models, Assessment and Management
- Regional and Global Models - Scaling and Linking
- Ecosystem Modeling - Flows of Energy and Materials

Sessions organized as Half-Day consecutive sessions

The purpose of the meeting is to provide a scientific forum for the exchange of ideas and information related to ecological modelling. Modellers involved in all types of scientific activities that include the development of ecological models are welcome. This meeting will also provide the opportunity to re-enforce collaboration among the members of ISEM.

Short Courses:

- AQUATOX Risk Assessment Model
- Forest Gap Modeling

Fees:

ISEM Members - No registration fee

Non-ISEM Members - \$50 (Includes ISEM Membership and Short Course)

Refreshments and Lunch Provided, reduced rate at Conference Hotel

Deadlines: Abstracts - June 30, 2004 Early Registration - July 15, 2004
